

# CORONAVIRUS SCREENER

---

Have you been out of the country in the past 14 days?

- Yes
- No

*If yes, present the next question:*

Have you traveled to any of these countries within the past 14 days?

- China
- South Korea
- Japan
- Italy
- Iran
- Has not traveled to a high-risk country

Have you been in contact with someone under investigation for, or with a confirmed case of the coronavirus?

- Yes
- No

Do you currently have a fever?

- Yes
- No

*If yes, what was your temperature the last time you took it? \_\_\_\_\_*

Are you currently experiencing any of the following symptoms?

- Cough
- Runny nose
- Sore throat
- Shortness of breath

*If the patient indicates they have one or more symptoms, when did these symptoms begin? \_\_\_\_\_*

**If the patient identifies that they have been to a country where there has been an outbreak, thinks they may have been exposed to someone with the novel coronavirus or lower respiratory symptoms, or positively indicates they have a fever or other symptoms, use one of these scripts depending on client preference:**

I am going to communicate your responses to our clinical team and will have someone reach out to you about your symptoms. Stay home until you hear from us, so you aren't exposed to additional germs.

Based on your answers to the survey, we recommend that you contact your healthcare provider immediately and communicate to them that [INSERT SURVEY ANSWER THAT CAUSED ESCALATION]. It is important that you stay in your home and ask your healthcare provider what steps you should take next.

**If the patient does not indicate any issues:**

Thank you for taking the time to talk with me today. I am happy to hear that you aren't having any symptoms. We recommend that you still take steps keep yourself healthy. These steps include:

- Washing your hands regularly and for at least 20 seconds each time. This is equivalent to singing or humming the happy birthday song twice.
- Avoid traveling to any areas where there has been an outbreak.
- Alerting your healthcare provider if you are experiencing lower respiratory symptoms (coughing, sore throat, runny nose, shortness of breath) or if you think you have been exposed to someone with the novel coronavirus
- Keeping a distance from people who are experiencing those symptoms
